

PRESS RELEASE

Hasenkamp settles in technology region Chemnitz

The traditional company underpins its location decision by founding a subsidiary specializing in assembly and high-tech logistics services.

Cologne-Frechen, February 23 - The name of the youngest subsidiary of the logistics company Hasenkamp says it all: *Hasenkamp Tech Services GmbH* offers transport and services for machines, plants and production equipment of the semiconductor industry, vacuum technology and automation technology. Companies from other branches of industry such as mechanical engineering are also part of the customer base. After Dresden, the establishment in Chemnitz is already the second branch in Saxony of the special logistics company, which originates from Cologne.

"Chemnitz, with its close ties to technology companies in one of the largest microelectronics and IT clusters in Germany, is an excellent location for our high-tech logistics division and a strategic starting point for providing customers with logistical support from the production site to the point of delivery. I am very pleased that with Bernd Albinus we were able to win over a proven expert and Saxony native with local knowledge for the management of Hasenkamp Tech Services GmbH," says Ralf Ritscher, Managing Director of the parent company Hasenkamp Holding.

"The challenges in logistics are great in many places," says Bernd Albinus, Managing Director of the Hasenkamp subsidiary, adding, "But so are the opportunities. Therefore, I see us well positioned in the market with a strong team. Our core competencies of machine assembly and reassembly, inbound and outbound shipments, installations, export packaging, and warehousing complement the manufacturing industry with crucial, quality services."

The new company places an additional focus on services in the healthcare sector, which includes transport, assembly and commissioning of medical equipment and large-scale devices, imaging systems as well as analytical equipment for medical technology.

About hasenkamp

The logistics company Hasenkamp, founded in 1903, is managed in the 5th generation by its owners Hans Ewald Schneider and Dr. Thomas Georg Schneider and by Ralf Ritscher. In addition to its headquarters on the Cologne city border in Frechen, the family-owned company has more than 40 locations worldwide. Around 1,000 employees lend a hand when it comes to planning, transport and storage of sensitive and valuable goods. Today, tradition and innovation at Hasenkamp are based on a regularly audited DIN and ISO certified quality, environmental and energy management process. This points the company's path into a sustainable future. Hasenkamp divides its activities into four business units: Fine Art, Relocation, Archive Depot and Final Mile Services.
